Recommender

The USI EMBA is a modular, advanced master in management degree, taught in English. Participants meet once a month in Lugano for two days, Saturday and Sunday, plus one day in e-learning, over a period of fifteen months. One module will be organized abroad (California, USA). The program's flexible format allows managers and executives to complete all the courses while working full time, as the presence in class is during the weekends. The degree ends with the opportunity for participants to apply their new knowledge and skills: under the guidance of a professor, they carry out a three-month-long keystone consulting project.

USI EMBA participants are managers and business leaders with significant professional experience, gained either locally or internationally, from all types of organizations, companies and institutions. They must be inspired by acquiring knowledge, insight and understanding relevant to their current and future positions and be motivated by the passion to succeed and the desire to further your competences, skills, and careers.

Your recommendation represents an important element of consideration in the admission of the candidate to the Executive MBA. The Executive MBA is an intensive program that demands a great deal of involvement, strong learning skills, organization skills, and the ability to work in a team.
